

~~CONFIDENTIAL~~20th October, 1960COCOM Document 4194 BCOORDINATING COMMITTEEMEMORANDUM BY THE FRENCH DELEGATIONEXPORT TO POLAND OF A COIL ASSEMBLY MACHINE

The French Delegation have the honour to inform the Committee that a licence has been requested for the export of a coil assembly machine covered by Item 1353 on the embargo list. Its characteristics are as follows:

Four-conductor Assembly Machine, made up of:

- 1 unwinder for 1-metre coil.
- 1 housing for 4 1-metre coils.
- 2 paper heads with centred coil.
- 1 drawing drum, diameter 1 metre.
- 1 winder for coils of a maximum diameter of 1m. 500

This machine is specially designed for the assembly of rubber-sheathed flexible conductors.

The net weight of this machine is 14,000 kg., the gross weight is 17,000 kg., and the total value franco at the frontier is NF 209,328, i.e. \$42,720.

Assurances against re-export will be obtained.

The French Delegation request the Committee to be good enough to give their views as soon as possible on this case, which is submitted under the special procedure established for Poland.
